WHO IS NTS?

NTS Computers Technology BV is a leading wholesaler in the field of used and new hardware. NTS has been a supplier for companies, resellers, government and foundations since 1998. Our customers are mainly located in Europe, Asia and the United States. NTS is a business partner of Hewlett Packard, Microsoft, Intel and IBM, among others. NTS has branches in Rotterdam, Oudenbosch and Deventer.

Thanks to direct purchasing from HPE and IBM, among others, we offer you consistently competitive prices. In the field of refurbishing and packaging used products, we are continuously looking for new and better solutions.

OUR MISSION

NTS Computers strives to be a reliable international ICT partner for high-quality new and refurbished computer equipment, by offering strict quality control, fast delivery and excellent service.

OUR CUSTOMERS

NTS Computers strives for optimal cooperation with our customers and partners in order to respond as best as possible to the demand of our customers and resellers for our products, solutions and services

Companies and MNO's

NTS Computers provides IT solutions to all kinds of companies, especially in the field of high performance workstations and servers, desktops and notebooks. We install systems with MsWindows 10 or 11 Pro MAR at very competitive prices.

Non-Profit / Foundation

NTS Computers provides foundations and non-profit organizations with desktops, servers, workstations and laptops in particular. Foundations and non-profit organizations operating in developing countries can benefit from the advantageous community editions of the Microsoft MAR program.

Private Individuals

NTS also delivers to individuals. Orders can be placed online, by phone, via Skype, WhatsApp or by email. Shipping is via parcel post or on pallet. Systems can also be picked up.

Goverment and Education

Many customers of NTS Computers come from educational institutions, because of the affordable systems and workstations that can be delivered by us. NTS can participate in tenders in the Netherlands and Belgium

Resellers

Resellers make up a significant part of our customer base. NTS supplies brokers and dealers from over 60 countries. Products are delivered quickly worldwide via our logistics partners or our own drivers.

PRODUCTS - SYSTEMS

NTS Computers has a wide product range from major brands such as HP and Lenovo, Cisco and Microsoft.

Through direct purchasing channels, NTS can offer these refurbished at a good price, but new products can also be ordered. Thanks in part to the refurbishing activities, a wide range of components is also available, often from stock..

The custom boxes in which NTS ships products can also be ordered separately or in bulk. The boxes are free of branding and have no external features that reveal the contents.

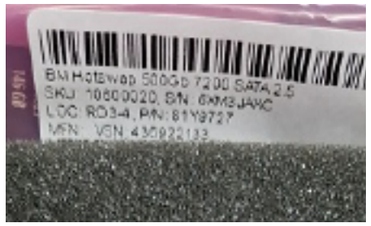

Workstations
Powerful workstations from HP, Dell and Lenovo, among others, can be fully configured to desired specifications with the System Builder in the NTS webshop. Workstations are packaged in custom-made boxes with sturdy white foam buffers. The box offers space for power cables and a keyboard. The system itself is packaged in a plastic bag to protect against dust and condensation..

Servers
NTS carries HP Enterprise, Supermicro and Lenovo servers, laid out to your specifications and shipped in sturdy, custom-designed boxes with foam padding and space for rail kits. The server is wrapped in a plastic bag for dust protection. Servers are shipped in boxes on pallets due to their considerable size..

PCs
NTS has a wide range of HP and Dell PCs to your specifications and in various form factors, including the compact mini-PC. NTS has also developed its own box for PCs with shock-absorbing buffers, which also has room for accessories.

Notebooks
Various HP notebooks for regular use and for education can be assembled in the System Builder of NTS and are available in large numbers. The notebooks can be pre-installed with Windows 10 or 11 Pro Mar. Notebooks are packed with adapter in insert boxes with white foam buffers. The notebook itself is packed in an anti-static bag.

PRODUCTS - PARTS AND PACKAGING

Testing and Packaging Components

Refurbished components are checked by NTS for functionality and tested before they are sold or used in systems. These are packed in an antistatic bag and placed in a box with foam or compartments. All products are provided with a label

Labels

The labels that NTS assigns to products have 2 barcodes. The barcode above the product description is SKU: the assortment number of NTS. The bottom one is the serial number of the manufacturer. Furthermore, a location is assigned, which shows in which branch the product is located, as well as the rack and location. For memories and CPUs, even the location in the storage tray can be read. Any deviating grading is noted under MFN..

Components

Video cards from nVidia, Kingston solid state drives, HP or Samsung memories, NTS can often offer components in secure custom packaging.

Network Products

Switches from HPE Aruba, Arista and Cisco are available both new and refurbished. Check our website for specifications and features.

Videocards

Video cards are tested for functionality. The card is connected, all ports are checked and any defects are found in this way. Video cards are also stored in an antistatic bag sealed with a warning label.

For video cards, NTS has compartmentalized boxes. In these, the video cards are stored upright, resting on a double layer of bubble wrap for shock absorption. Location labels on the bags and boxes ensure that the cards can be easily found in the inventory system.

Memories

NTS has special packaging for memories in the form of trays with lids. These are also stored in these. These trays have the location label on the lid. Memories are functionally tested when preparing systems.

HDD/Solid state drives

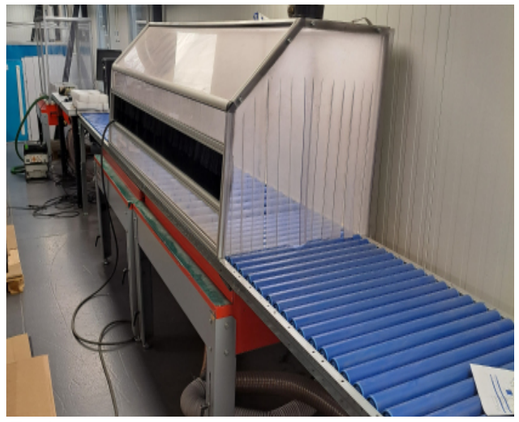

Hard drives are tested using the HD Sentinel program (https://www.hdsentinel.com). HD Sentinel creates a smartlog for each tested drive, which includes bad sectors, hours of spin time, and read-write errors. Drives that are found to be good are packed in an antistatic bag, which is sealed with a static electricity warning label. The product is then also given a location label, which allows the storage location to be found in the inventory system. Packed hard drives are shipped to NTS stored in sealed boxes with soft foam padding, which minimizes the chance of damage during storage or dust.

REFURBISHMENT

In recent years, many organizations have used leasing solutions for IT equipment. After the contract period, the used systems are returned to the leasing company. Technically and cosmetically, these products are of a very high level and are also generously sized to run current modern applications. Most of these systems are three to six years old and are from well-known brands such as HP, Lenovo, Dell, Samsung and Apple. These systems can deliver the performance you need at a favorable price.

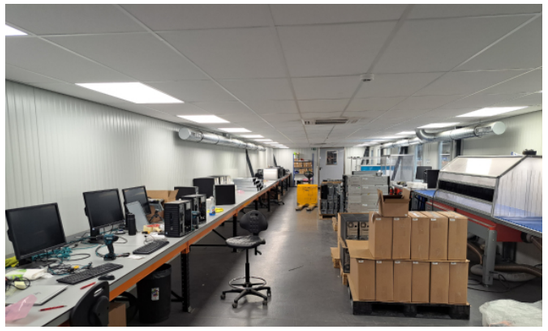

Cleaning Method

The inside of the systems is dusted in our custom dust cabin. The outside is cleaned and where necessary provided with a new coat of paint by NTS for a uniform appearance.

Testing

“Financial benefit and better for the environment; production of new systems uses up to 10 times their weight in raw materials. Refurbishment contributes to the extension of the life cycle of computer products.”

Installation

NTS Computers is a Microsoft Authorized Refurbisher (MAR). This allows NTS to offer pre-installed Microsoft Windows software such as Windows and Ms Office on refurbished computers at competitive prices. MAR licenses can only be issued without physical media on refurbished computers and are pre-installed on NTS systems. The software comes with fully legal licenses and a Certificate of Authenticity (COA).

Packaging

Systems are packed in specially made boxes with foam buffers. A workstation is packed in a plastic bag against dust and/or splash water individually per box with 2 foam buffers and accompanying accessories such as power cable and keyboard. These boxes are tested for optimal safety during shipping.

- Our refurbished products have been intensively tested and cleaned
- All devices sold by us will last for years to come to be able to work without any problems.
- The products are uniform, cosmetically and in terms of specificaions.
- NTS provides a minimum of 1 to 3 years warranty, depending on the product.
- A very competitive price. NTS is one of the leading companies in the refurbished field in the Benelux.
- Fast delivery, often from stock.
- Our refurbished products are maintained by our own technical department.

REPAINT

A new look for refurbished systems

The appearance of a computer is important. NTS guarantees the uniformity of your devices by providing them with a new coat of paint if necessary.

In our specially designed repaint facility, equipped with professional spray equipment to refurbish computer casings, the machines are sanded, cleaned and sprayed with a durable layer of lacquer, so that they look as good as new again.

THE REPAINT PROCESS

The process of repainting systems consists of the following steps. These are done in-house at NTS.

Cleaning

Before a system can be repainted, labels and adhesive residues from stickers are removed. This is done with an environmentally friendly cleaning agent. The system cover is cleaned so that no dust gets stuck under the paint layer.

Sanding and Filling

To allow the paint to adhere, the system covers are completely sanded and any scratches are filled. Systems are always sprayed completely, even with local irregularities. This keeps the paint layer uniform.

Spraying

In the spray booth, the systems are provided with a new layer of paint. This paint is a 2k topcoat on water basis, color matched with the original housing. Filters in the booth and for the air exhaust limit the emissions for the environment.

Drying

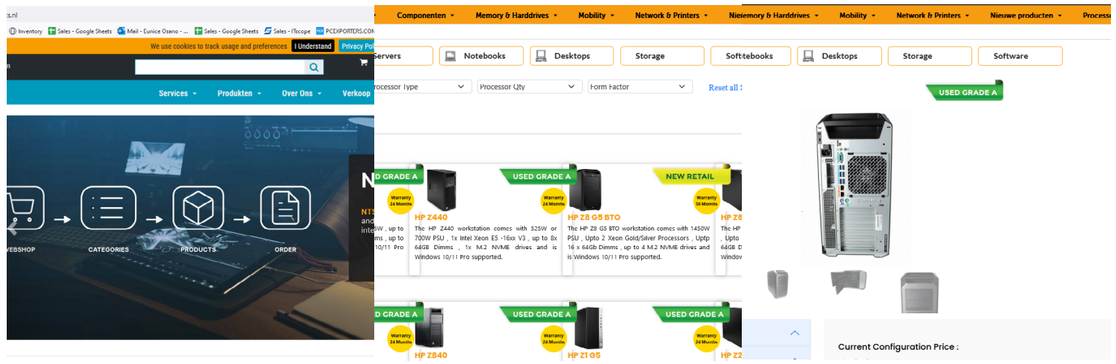

In our drying room, the paint layer on system hoods can harden using infrared lamps. The drying room is equipped with an extraction system to remove vapours from the drying process.

After drying, the systems are ready for assembly.

SYSTEM BUILDER

The NTS System Builder is a way to easily assemble workstations, servers, PCs or notebooks, request quotes or place orders directly.

WORKING WITH THE SYSTEM BUILDER

In the System Builder of NTS, systems can be assembled component by component using convenient dropdown menus. The price of your selections is updated in real-time on the digital assembly slip.

The System Builder is available in the NTS webshop. You can configure products without logging in, but to request quotes, place orders, or export to PDF, you must be logged in with your NTS account. Simply choose your desired category, and the models will be displayed by brand.

INFORMED COMPONENTS CHOOSING

Can select the desired components from the dropdown menus. Any compatibility warnings will be highlighted in red. To view product information, simply hover over the product names with your mouse. Clicking on a product will display extended information.

DIRECT INSIGHT INTO COSTS

The price list tracks the costsper system in real time and saves this information directly in your shopping cart. This ensures your settings are preserved even if you leave the page. Systems can be removed with a single click, without affecting the rest of your shopping cart.

QUOTES, ORDERS AND PDF

When you are satisfied with the composition and quantity, can request a quote or place an order directly. You will receive responses to quote requests and order confirmations via email. Additionally, you can save your assembly slip, including prices, as a PDF.

SERVICES

HELP DESK
Experienced technical staff is available during office hours to help you with any questions. Many problems can be solved by phone this way, saving time and shipping costs.

REPAIR
Our technical service can perform repairs. Troubleshooting, replacement of parts, often from stock, are among the possibilities that NTS can perform for you.

DESIGNATED ACCOUNT MANAGER
All our customers are assigned to a permanent account manager. This person will handle your questions

DELIVERY ON ACCOUNT
After a credit check has been found positive, NTS can deliver on account for 30 days. Government institutions within Western Europe can in principle always buy on credit.

WORLDWIDE TRANSPORT WITH TRANSPORT INSURANCE
Parcel or pallet, NTS delivers its products anywhere in the world using our transport partners, ensuring the customer receives the fastest and most cost-effective transport option.

TRADE-IN
NTS takes care of the trade-in of your old products for newer models. This leaves room in your IT budget. We can also often take back old sold hardware from resellers.

MIGRATION
NTS installs the systems at your organization's location on request and collects the old systems. We can pre-install hard drives with an image provided by you or with Intune. We can safely format your old systems with YouWipe..

TENDER QUOTATIONS
NTS can prepare tender quotes and special price requests from various manufacturers, so you can always expect the best prices.

DEMO PROGRAM FOR SCHOOLS AND COMPANIES
If you want to test our refurbished products first, NTS has demo models available for our most sold products. You can test these for 60 days without obligation. After this, you can keep the products for an attractive discount or return them to us free of charge

CERTIFICATION

NTS participates in European tenders, in particular Dutch and Belgian tenders.
On Tenderned (https://www.tenderned.nl)and BOSA eProcurement (https://www.publicprocurement.be) All applications for the Netherlands and Belgium with an estimated value above the European threshold of EUR 143,000 are listed. These are legally put out to tender in Europe

The Certificate of Conformity is respected in the client Operators' operation documented their systems and procedures to adhere to the WEEELABEX requirements outlined in the normative documents as listed above, and complying with the terms and conditions agreed with the WEEELABEX Organization and in the 360 WEEELABEX Guidance Document.
The Certification of Conformity document is the property of the WEEELABEX Organization and shall be returned, upon request to the WEEELABEX Organization in execution of certification by voluntary means, or in the event of withdrawal, suspension or revocation of certification. The use and display of the Certificate of Conformity and of the WEEELABEX Organization asserted to the WEEELABEX Operator is subject of the MOU Agreement for Outreach and Declaration for Re-use Operators and 004 WEEELABEX Guidance Document.

Certification body Operators, WEEELABEX Organization, U Habrovky 247/11, Kré, 140 00 Praha 4, Czech Republic. Tel.: +420 225 851 402, web: www.weeelabex.org

For which organizations is NTS an interesting partner?

NTS focuses mainly on resellers, companies and education. In particular, we supply used Workstations, PCs, Laptops, Servers, Network and computer parts to many organizations. Many customers in the Benelux also buy all their new equipment from us because we are not supplier or brand-bound and can supply all well-known brands of hardware and software.

Certification

NTS has been in possession of CENELEC certification since March 2024 and is listed as a WEEELABEX operator on https://www.weeelabex.org/operators-list/ The abbreviation WEEELABEX stands for Waste of Electric and Electronic Equipment Label of Excellence and means that the collection, storage and recycling of waste electrical and electronic equipment is carried out in accordance with the quality standard established by WEEELABEX

NTS also has a VIHB certificate from NIWO. This means that NTS is allowed to transport e-waste in a responsible manner.

NTS operates its own quality and environmental management system that is equivalent to ISO-9001 and 14001. The documentation for this can be requested and is provided as standard with tender responses

TECHNICAL SERVICE AND HELPDESK

Helpdesk

NTS offers a helpdesk as an additional service to the customer. The helpdesk is a telephone helpline provided by our technical department, which you can reach during office hours and is a first troubleshooting option. Many problems can be solved quickly and efficiently, without the need for shipping costs. The helpdesk provides support for Windows installations/driver installations/hardware errors.
Fast, convenient and free of charge - helpdesk warranty is included with almost all NTS products. The helpdesk service is available for as long as the warranty on your product. If the helpdesk cannot solve your problem, you can of course always use the carry-in warranty agreements; the helpdesk also handles the RMA handling.
.

Onsite installation

NTS offers On-site installation of systems. This consists of unpacking and connecting hardware at the workplace, starting up thesystem and hanging it in the domain. If necessary, removing and disposing of the hardware to be replaced. In the quotationprocess, it can be stated that on-site installation is desired. An hourly rate, estimate of working hours and number of employees required will be indicated. The final costs are calculated afterwards. The hard drives or SSD drives of the systems can be installed in advance with an image supplied by you.

Imaging

NTS offers the service to image hard drives. This can be done upfront using Windows Deployment Services (WDS), or using Macrium after the customer has installed a sample system. Refurbished systems can be delivered with pre-installed Windows MAR licenses (Microsoft Authorized Refurbisher). The most common versions are Windows 10 and 11 Pro and Education. MAR licenses have no physical media, are available in all languages and cost significantly less than a commercial license. The license is linked to the HWHash of the device by NTS via Windows Deployment Services (WDS).

Intune Pre-Setup

Windows Autopilot offers a pre-provisioning service, which allows CSP partners (Cloud Solution Partners) such as NTS Computers Technology BV to register and provision a fully configured and business-ready Windows PC in advance. An Intune subscription is required for this.

Microsoft Intune

Windows

MDT / WDS

TRADE-IN

If your organization wants to replace the systems, you may want to sell your current machines and have them disposed of. NTS can usually give you a reasonable estimate by phone or email of what your surplus hardware is worth. The final valuation is done on a post-calculation basis when the products have been inventoried.

Audit

NTS can perform an audit of the equipment on request both before and after, this can be done both onsite and after collection by NTS. The total trade-in price is determined based on the audit. The audit is delivered via Excel file.

Transport

Transport is arranged by NTS. Delivery options are requested in advance, based on which NTS will send packaging material ahead if necessary. By appointment, NTS can deploy people to prepare the trade-in batch for transport

Inventory

Once arrived at NTS, the batch is checked and inventoried using an Excel list, after which disassembly follows. The serial number per product is used to determine whether products can be recycled or are suitable for resale. The final trade-in is based on the Excel inventory list.

HDD wiping

If desired, NTS can delete your file information using the wiping software YouWipe. There are costs associated with this. The YouWipe secure standard is threefold: the program sets all data to 0, 1, and finally a random pattern, verified after each step. YouWipe issues a triple pass security certificate per disk, demonstrating that any data on the disk has been removed to an industry-standard level.

Youwipe

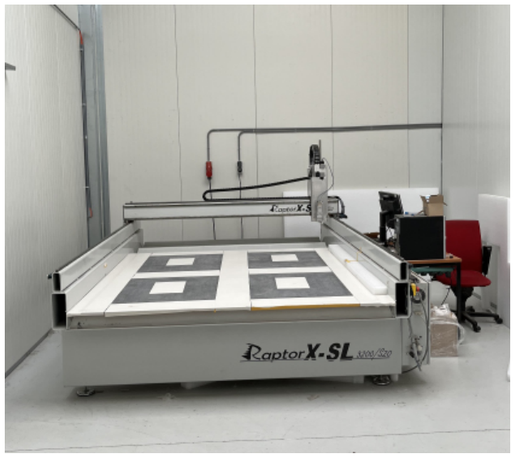

Processing

All traded-in products are dismantled by NTS and either sold per component or taken away for recycling to Holland Recycling, which, like NTS, is in possession of Cenelec certification..

CENELEC

STORAGE & PACKAGING

The System Builder from NTS is a way to easily assemble workstations, servers, PCs, or notebooks, request quotes, or place orders directly.

Packaging for components

For components, NTS has a range of safe packaging solutions that are also used during storage in our warehouse.

For CPUs and memories, NTS has various stackable trays and individual clamshells, depending on the number of packed parts. The CPU trays are specially designed for the common models. Numbers per tray differ depending on the type of product.

For video cards, NTS produces foam inlays for insert boxes with the CNC machine. For hard disks, there are slot fillings of soft gray foam for the shipping boxes so that larger quantities can be shipped safely.

Video cards, hard drives and plug-in cards are individually packed in antistatic bags.

All shipping packaging is also available separately in our webshop, whether it concerns memory trays in bulk or a small number of workstation boxes with foam buffer.

NTS has several models of shipping boxes with custom foam buffers for workstations, PCs, laptops, servers and TFT screens, so that products are always shipped in an optimally fitting box and the chance of damage during transport is minimized.

NTS manufactures the foam buffers themselves. These are cut from white foam sheets by means of a CNC machine, based on CAD design. This way there is always room to make improvements to the design. Workstations are packed in logo-free, double-layered corrugated cardboard boxes. The box offers space for accessories and rails. Systems are packed in a plastic bag to protect against dust.

Memory tray

CPU tray

Video card box with foam inlay

Server box with buffers

Workstation box with foam buffers

Laptop box with buffers

RECYCLING

Electronic waste (e-waste) is a general term used to describe all types of old or discarded electrical and electronic equipment. E-waste contains both valuable and hazardous materials that require special treatment and recycling methods to reduce the negative environmental impact of used technology.

The disassembly process at NTS ensures optimally separated processing flows.

NTS takes back your old equipment and disposes of end-of-life products only to WEEELABEX certified processing facilities and offers secure data destruction options to protect your data.

A WEEELABEX certificate shows that a company demonstrably meets the legal requirements for processing electronic waste.

WEEELABEX
CONFORMITY & VERIFICATION

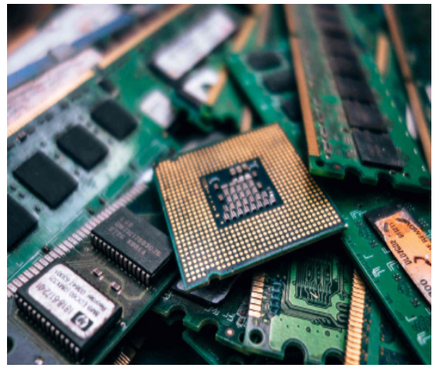

WHAT NTS CAN DO FOR YOU:

Trade-in quote
When your organization is looking to replace systems, you may want to sell and dispose of your current machines.

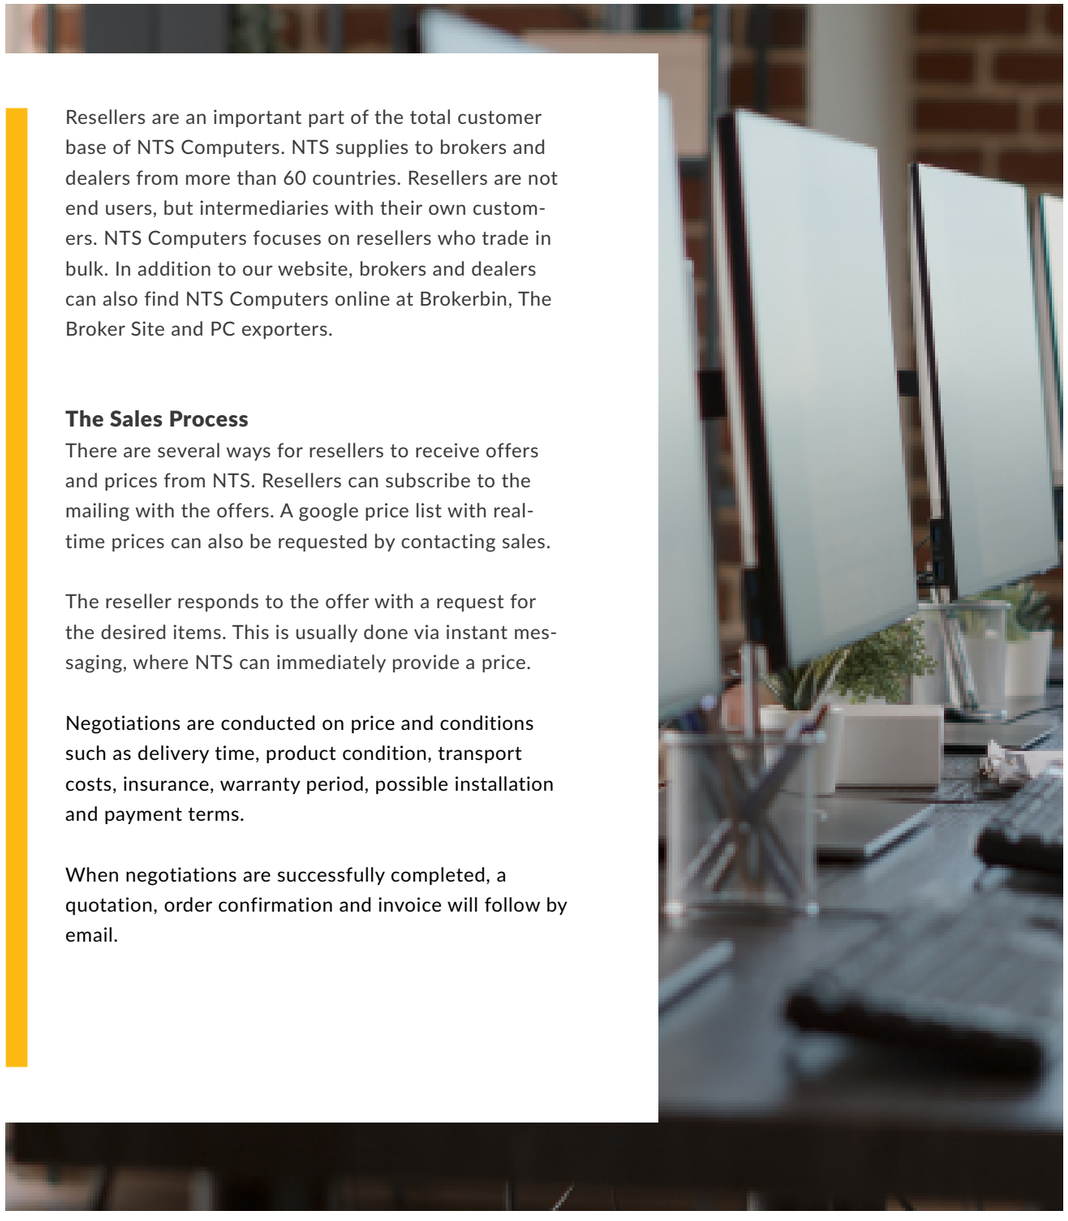

NTS can usually give you a reasonable estimate of what your surplus hardware is worth by phone or email. For lots that are worth more than 1,000 euros, we can often make an offer. Please send an email to your account manager. You can also offer lots to NTS that you have left over from a previous migration.

Audit
NTS can perform an audit of the equipment upon request, both beforehand and afterwards. This can be done both onsite and after collection by NTS itself. The total trade-in price is determined based on the audit. The audit is delivered via Excel file.

Free disposal
If the products have little to no commercial value, NTS customers can have them removed by us free of charge. If the products were not purchased from NTS, this is often possible; please inquire with the sales department for the possibilities

TRADING

Resellers are an important part of the total customer base of NTS Computers. NTS supplies to brokers and dealers from more than 60 countries. Resellers are not end users, but intermediaries with their own customers. NTS Computers focuses on resellers who trade in bulk. In addition to our website, brokers and dealers can also find NTS Computers online at Brokerbin, The Broker Site and PC exporters.

The Sales Process

There are several ways for resellers to receive offers and prices from NTS. Resellers can subscribe to the mailing with the offers. A google price list with real-time prices can also be requested by contacting sales.

The reseller responds to the offer with a request for the desired items. This is usually done via instant messaging, where NTS can immediately provide a price.

Negotiations are conducted on price and conditions such as delivery time, product condition, transport costs, insurance, warranty period, possible installation and payment terms.

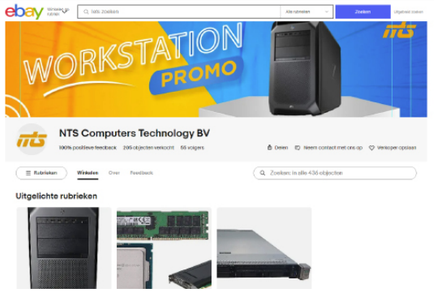

When negotiations are successfully completed, a quotation, order confirmation and invoice will follow by email.

E-COMMERCE

NTS.nl

The best option for information about NTS is nts.nl, our own website. Here you will find, in addition to company and product information, for example, also help with the installation of components. In the webshop, use the handy System Builder, with which you can put together a system yourself and order it directly or request a first quote.

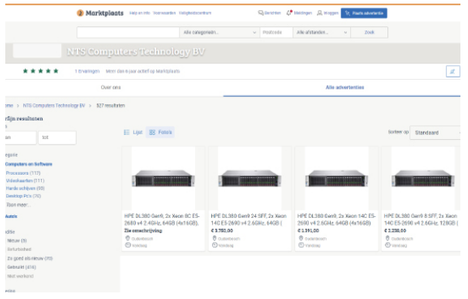

www.facebook.com/NTScomputersBV

For news about promotions and offers, visit our Facebook page. Here, the most current promotions are announced and reels can be found about products and the system builder, for example.

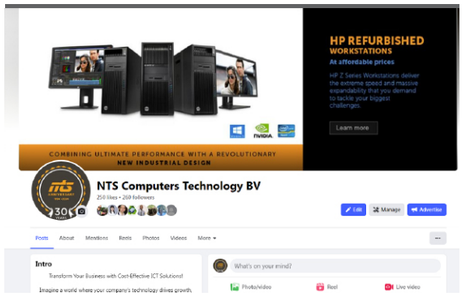

www.ebay.nl/str/ntscomputerstechnologybv

Most products from the NTS webshop are available on eBay. Photos and specifications are listed per product on the product pages. Payment in this case is via eBay and the order processing is as you are used to from NTS.

www.2dehands.be/u/nts-computers-bvba/48690025/

A selection of the products offered by NTS are also available via 2dehands.be. Photos and specifications are on the individual product pages. Payment is via 2dehands, handling via our Belgian BV. Products are shipped from the Netherlands.

www.marktplaats.nl/u/nts-computers-technology-bv/25912185/

A large part of our assortment can also be ordered via our Marktplaats shop. Specifications and shipping options are indicated per product on the product sites. Payment is via Marktplaats. Processing and shipping is done from NTS in the Netherlands.

LOGISTICS

Packaging for components

NTS has chosen DHL and Fedex Express as carriers because of their excellent parcel distribution throughout Europe. DHL has an extensive network and normally delivers within 3 working days throughout Europe. Within the Benelux this is even 2 days. DHL transports parcels up to 20 kg.

Servers and high-end workstations are always transported on pallets due to their size and/or value.

Valuable packages, urgent shipments and intercontinental orders are shipped insured with FedEx.

NTS always sends tracking codes in the shipping confirmation

Pallet shipments

Within the Netherlands, NTS pallets are often delivered by DHL or by their own courier. For larger shipments (one or more (mini)pallets), which are too large or too far away for our couriers, DHL is also used. DHL normally delivers within 24 hours in the Benelux.

Trade Networks

For European shipments Dachser is used. Parcel shipments are mostly sent with Fedex express

For intercontinental shipments of parcels and pallets, FedEx Trade Networks and TNT are used because of their reliability, speed of delivery and tracking options

Products are placed on the pallet in such away that they do not fall outside the pallet edge

Products are secured to the pallet with tension straps. To protect the corners, they are protected with cardboard profiles

For extra impact protection, the pallet is wrapped in bubble wrap wrapped

The whole thing is then wrapped in a layer of sealing foil. This provides protection and is splash-proof, so the products arrive dry.
